

Nut growers gain the visibility necessary to mitigate risks and impact outcomes.

Stay competitive against shrinking prices and profits.

We partner with nut growers to digitize their operations and build the autonomous farm of the future. Whether you are growing walnuts, pistachios, almonds, hazelnuts, macadamias, or pecans, Fieldin helps you:

- Manage your labor force across your entire operation and vast distances.
- Monitor what your crew did from anywhere and any time using an intuitive app.
- Mobilize and orchestrate your day-to-day tasks for better consistency, efficiency, and accuracy.
- Reduce the complexity of managing your various types of machines and unique specifications for each crop.
- Use a new level of standardization by integrating and connecting all your data.
- Make it easier and cost effective to manage through your crunch times.

Optimize for quality at every step

In the face of rising costs and shrinking margins, successful growers depend on the ability to run a lean and efficient operation. Quality is at the heart of everything Fieldin tracks and measures. It starts with making sure your operation becomes a well-oiled machine; Fieldin does this by reducing variability across equipment, operators, and regions while also raising performance benchmarks.

Having access to more data, gaining actionable insights, and updating tasks accordingly is how our customers are able to successfully improve every aspect of growing their crops resulting in a higher quality crop and use of their land.

“FieldIn gives my team the real-time data we need to manage multiple operations and locations... The data and support Fieldin provides has exceeded my expectations.”

Zach Maring

Farming Operations Manager
at Del Mar Farms

- **Control costs across your key activities:** improve the ability for supervisors and managers to cover large and distributed orchards.
- **Increase the return on your orchard:** use the Scouting application to report on pest pressures, create a plan to eradicate, give greater visibility to your crew, and report on the results to make any other adjustments. During harvest, track shaking activities against various standards to gain tighter controls to minimize under-shaking and reduce over-shaking.
- **Enforce your safety standards and ESG initiatives:** hold your crew accountable for following safety rules. Report and improve sustainable business and environmental practices such as using less pesticides and also reducing CO2 emissions.

Start your journey to operational efficiency.

Our 5 step process allows you to move at your own pace while never losing sight of the end goal.

- **Step 1 - Digitize your operation:** Unparalleled visibility on every mechanical activity.
- **Step 2 - Get data-driven insights:** Advanced dashboards to identify inefficiencies and optimizations.
- **Step 3 - Deploy autonomous capabilities:** Increasingly remove the dependency on an operator in the cab.
- **Step 4 - Automate decision-making:** better efficiency by turning data into actionable insights to update instructions.
- **Step 5 - Reimagine farm design:** transform day-to-day activities based on changing agricultural technologies and new practices.

Get visibility across activities that impact nut grower success.

Fieldin addresses core activities performed every day across a nut growing operation. The more you use Fieldin to track and gain insights, the more you impact your business performance and outcomes. The platform provides a new level of standardization by integrating and connecting all your data.

We help improve the performance and outcome of key activities:

- Cultural Practices: spraying, mowing, hedging, and more
- Scouting
- Harvesting
- ATV & Truck Tracking
- Autonomy including auto-spraying

We can show you how to make your operations more consistent, accurate, and efficient. Schedule your demo fieldin.com/schedule-demo.
