

Olive growers gain the visibility necessary to mitigate risks and impact outcomes.

Improve the accuracy of spraying and optimize factors such as time to the mill during harvest.

We partner with olive growers to digitize their operations and build the autonomous farm of the future. If you are a grower of olives used to make olive oil, Fieldin can help you:

- Gain visibility and transparency on tasks performed and their outcomes.
- Monitor what your crew did from anywhere and any time using an intuitive app.
- Create reports that demonstrate that work was performed to a specific standard.
- Compare employee and equipment efficiency and productivity to improve performance metrics.
- Improve the accuracy of key activities such as spraying your olive grove.
- Leverage automation to improve the economics of growing high density crops.

“Fieldin gives my team the real-time data we need to manage multiple operations and locations... The data and support Fieldin provides has exceeded my expectations.”

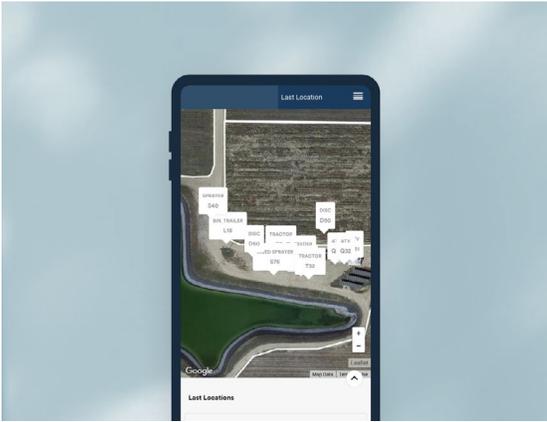

Zach Maring
Farming Operations Manager
at Del Mar Farms

Optimize for quality at every step

Growing a high density crop such as olives demands the ability to run a lean and efficient operation. This requires a focus on efficiency and execution, which is at the heart of everything Fieldin tracks and measures. We make sure your operation becomes a finely-tuned machine by reducing variability across equipment, operators, and regions while also raising performance benchmarks.

We can help you improve every aspect of growing crops by providing access to more data, gaining actionable insights, and updating tasks accordingly. This is how our customers are able to get higher quality crops and make better use of their land.

- **Control costs across your key activities:** Reduce the overhead associated with reporting and demonstrating that work was performed to a specific standard. Track every mechanized and operator activity using advanced reporting which is viewable on a mobile device and keep crews accountable over large and distributed groves.
- **Increase the return on your olive grove:** Impact your bottom line by coordinating key activities, especially during the critical harvesting time by optimizing your harvest window based on acidity levels and time to the mill. Plan and complete your harvest faster with the ability to manage blocks and sub-blocks within your groves.
- **Enforce your safety standards and ESG initiatives:** Hold your crew accountable for following safety rules. Report and improve sustainable business and environmental practices such as using less pesticides and also reducing CO2 emissions. Provide transparent reporting that demonstrates adherence to standards.

Start your journey to operational efficiency.

Our 5 step process allows you to move at your own pace while never losing sight of the end goal.

- **Step 1 - Digitize your operation:** Unparalleled visibility on every mechanical activity.
- **Step 2 - Get data-driven insights:** Advanced dashboards to identify inefficiencies and optimizations.
- **Step 3 - Deploy autonomous capabilities:** Increasingly remove the dependency on an operator in the cab.
- **Step 4 - Automate decision-making:** better efficiency by turning data into actionable insights to update instructions.
- **Step 5 - Reimagine farm design:** transform day-to-day activities based on changing agricultural technologies and new practices.

Get visibility across activities that impact olive grower success.

Fieldin addresses the daily activities performed in an olive growing operation. Your ability to impact outcomes and business performance improves the more you use Fieldin to track and gain insights. The Fieldin platform provides a new level of standardization by connecting and integrating all your data.

We help improve the performance and outcome of key activities:

- Cultural Practices: spraying, mowing, hedging, and more
- Scouting
- Harvesting
- ATV/UTV & Truck Tracking

We have over 750,000 acres managed and growing every day. We can show you how to make your operations more consistent, accurate, and efficient.
